# SMSC in Science

## Spiritual

Science supports spiritual development by providing many opportunities for children to think and spend time reflecting on the amazing wonders which occur in our natural world.

## Moral

Science supports moral development by showing children that different opinions need to be respected and valued. There are many moral and ethical issues that we cover in science including discussions about environmental and human issues.

## Social

Science supports social development by exposing children to the power of collaborative working in the science community which has lead to some amazing and life changing breakthroughs in medicine. When undertaking experiments and research children work collaboratively.

## Cultural

Science supports cultural development by looking at how scientists from a range of cultures have a significant impact globally. It also helps children to understand how important science is to the economy and culture of the UK.
